

## NATURE IMPACT® WALL – unique and creative design options for your building

Nature Impact® Wall is a vertical garden that gives you a captivating array of design options. Such as planting colorful flowers or edible plants in your wall system.

The system adds great aesthetic value to the space in which it is placed.

Wall also enables you to include environmental considerations in the process. If you're looking for a product that offers a wide range of benefits in addition to its attractive and decorative appearance, Wall is the solution for you.

The system has noise-reducing properties – with a proven reduction of 13-17 dB in studies.

The system also produces oxygen and absorbs dust particles.

## GREEN WALLS

- a reliable wall solution  
from Nature Impact®

Five generations of plant experience shines through clearly. This means we can offer a unique product with a 100% plant guarantee.

We are part of the process, from idea development to design, delivery and maintenance.

Drawing on our extensive experience with plants, we have solved the common problems associated with watering plant walls. This means that we can now water the wall thoroughly, and wait up to three weeks before watering again.

Green walls require mechanical watering, which is now controlled via apps.

We can also help if you wish to use collected rainwater for watering.
